INTRODUCTION

Computer Science graduate and Full-Stack Web Developer with over two years of experience developing and maintaining government web applications, including Electronic Medical Record (EMR), Tourism Management and Booking systems. Experienced in Laravel, PHP, MySQL, Python, and modern frontend technologies, with a strong background in collaborating with stakeholders, gathering business requirements, and delivering scalable software solutions. Passionate about building user-focused applications, solving technical challenges, and continuously learning new technologies.

EXPERIENCE

Provincial Government of Camarines Sur

Jul 2024 – Present

Computer Instructor / Programmer

Cadlan, Pili, CamSur

- Designed and delivered engaging computer programming lessons, improving student understanding of programming concepts through interactive instruction and practical exercises.
- Developed and supervised hands-on coding projects that strengthened students' problem-solving abilities and reinforced real-world software development practices.
- Introduced students to Unity Game Engine and C# programming, guiding them in the fundamentals of 2D and 3D game development.
- Collaborated with clients and stakeholders to gather business requirements, validate system functionality, and ensure the successful delivery of web-based applications.
- Worked closely with healthcare professionals and cross-functional teams to analyze workflows, design user access controls, and enhance Electronic Medical Record (EMR) system processes.
- Provided technical support and troubleshooting for an outsourced Electronic Medical Record (EMR) system, resolving user issues and ensuring reliable system operation.

Ateneo de Naga University - NOCS

Jan 2024 – May 2024

Voluntary Network/IT Staff

Naga City, CamSur

- Provided technical support to staff and helped resolve software and hardware issues.
- Assisted in implementing software solutions and improving system functionality.
- Collaborated with cross-functional teams to identify and address technical challenges, fostering effective communication.

PROJECTS

Goldy: An NLP-based Chatbot in English Learning for Primary Education

- Goldy is a Senior Thesis study focusing on the application of Natural Language Processing(NLP) to Primary Education.
- Developed a web application chatbot with Flask as our web microframework and conducted an experiment to Grade 4 elementary students with the help of Ateneo de Naga University Grade School to know the possibilities and uses of these kinds of technologies to education.

Visit CamSur Official Website

- **visitcamsur.com** is the official website of the Provincial Government of Camarines Sur to promote the tourism of Camarines Sur.
- Developed and deployed complex frontend interfaces for the tourism platform, implementing pixel-perfect design revisions to enhance site-wide navigation and user engagement.

Visit CamSur Web Booking System

- **book.visitcamsur.com** is the official booking system of **visitcamsur.com**.
- Translated complex Figma/UI designs into high-performance, responsive web pages and features for the official booking system, ensuring a seamless user experience.

EDUCATION

Ateneo de Naga University

Bachelor of Science in Computer Science

2018 - 2023

Naga City, CamSur

- **Thesis:** Goldy: An NLP Application Chatbot in English Subject for Primary Education

SKILLS

Solution Development : Requirements Analysis, System Workflows, Solution Design, Quality Assurance

Full Stack Development : HTML/CSS, REST APIs, Flask, Laravel, MySQL, Tailwind

Programming Languages : Python, C#, PHP

Tools : Github, Google Workspaces, Postman, Figma, LaTeX

CERTIFICATIONS

Google for Education

Gemini Certified Educator

2026 - 2029

Credential Number: 174116177

Google for Education

Google Certified Educator Level 1

2025 - 2028

Credential Number: 168770439

Google for Education

Google Certified Educator Level 2

2025 - 2028

Credential Number: 168783358

freeCodeCamp

Foundational C# with Microsoft

2025
